

Neuroscience Graduate Program

We offer PhD and MS degrees with a concentration in Neuroscience and Experimental Therapeutics. Our small faculty-to-student ratio facilitates one-on-one interactions on a daily basis both in the laboratory and the classroom.

Program Highlights:

- **FINANCIAL SUPPORT:** An annual stipend, tuition paid by the department, health and dental insurance.
- **TRAINING OPPORTUNITIES:** We offer rotations with different mentors before selecting a lab for your thesis. Students engage in research, receive individualized mentoring, attend conferences, and enjoy social and scientific outreach events.
- **CAREER PATHS:** Graduates of the program go on to have successful careers in academic research, biotech, medical, and other related fields.

Neuroscience Faculty

Dr. Sophie Belin
Myelin disorders

Dr. Yunfei Huang
Epilepsy

Dr. Alexander Mongin
Stroke & Brain tumors

Dr. Yannick Poitelon
Peripheral neuropathies

Dr. Irma Rukhadze/
Dr. Victor Fenik
Sleep Disorders

Dr. Shannon Stephens
Neuroendocrinology &
Addiction

Dr. Kristen Zuloaga
Alzheimer's disease &
Sex differences
